EXPERIENCE

Frontend Developer Intern

Storyloom Solutions Pvt Ltd | Jan 2025 – Present

- Converting Figma designs into fully responsive and interactive web pages using **Next.js** and **React.js**.
- Implementing **React Query** for efficient API integration and state management, improving frontend performance and user experience.
- Creating responsive user interfaces using **Tailwind CSS** and leveraged component libraries like **ShadCN** for faster development.
- Testing and validating RESTful APIs using **Postman** to ensure correct data flow between frontend and backend services.
- Gained experience with **Redis** for caching to enhance application performance.
- Using **Docker** for local development and ensuring consistent environments, Managing tasks via **Jira** and maintaining code workflow by creating tickets and pushing updates to the **GitHub** repository.

PROJECTS

InstaVibe | Social Media Web Application

Full-stack Next.js application with real-time post interactions and user authentication

- Developed a complete social media platform implementing **CRUD** operations, user authentication, and interactive functionalities for post creation, likes, and comments.
- Designed a dynamic and responsive UI using **Next.js** and **Tailwind CSS**, with features like post notifications, profile updates, and interactive user engagement.
- Engineered folder-based routing and **RESTful APIs** with Next.js for efficient backend handling, integrating PostgreSQL and Prisma ORM for robust user, post, and comment data management.
- **Technologies:** Next.js, Prisma, PostgreSQL, Tailwind CSS, ShadCN, Clerk, RESTful APIs

Microsocial | Scalable Microservices-Based Social Media Backend

Modular backend system architected with Node.js, Docker, and RabbitMQ for a real-time social media platform

- Developed independent microservices (Auth, Post, Search, Media) with RESTful APIs using **Node.js** and **Express.js**, each with its own database for scalability.
- Containerized services with Docker and orchestrated via Docker Compose; implemented asynchronous communication using RabbitMQ for loose coupling.
- Used **Redis** for caching and session management; applied middleware like **Helmet**, **Joi**, **CORS**, **rate-limit**, **httpd-proxy**
- Followed backend best practices emphasizing service separation, event-driven messaging, and scalable API design.
- **Technologies:** Node.js, Express.js, Docker, Redis, RabbitMQ, MongoDB, RESTful APIs, Microservices Architecture

TECHNICAL SKILLS

Languages: C, Java, JavaScript, TypeScript, HTML, CSS

Frameworks/Libraries: React.js, Next.js, Express.js, Axios, Socket.io, React Query, Redis

Databases: MongoDB, MySQL, PostgreSQL

Developer Tools: Node.js, VS Code, Git, GitHub, Docker, Prisma, Postman, Jira

Cloud & Infrastructure: RabbitMQ, Microservices Architecture, Basic knowledge of AWS (EC2, S3, IAM),

Other: RESTful APIs, Linux, Responsive Web Design, Agile Methodologies

ACHIEVEMENTS

- **1st Runner-Up | NewGenAI Hackathon 2024:** Secured second place in the hackathon organized by MIT Chhatrapati Sambhajinagar and Findability Sciences Pvt. Ltd., showcasing expertise in AI and teamwork.
- **Full Stack Web Development Certification | Udemy:** Completed comprehensive course by Angela Yu, covering front-end and back-end development technologies including HTML, CSS, JavaScript, Node.js, and databases.

EDUCATION

Bachelor of Technology in Computer Science and Engineering

Expected: 2025
