

PRANAV JOSHI

8625801402 — pranavsj02@gmail.com — LinkedIn — GitHub — Portfolio — Chhatrapati Sambhajnagar, Maharashtra

PROFILE

Full Stack Developer with ~1 year of professional experience delivering end-to-end web applications. Proficient across the entire stack — React.js, Next.js, TypeScript on the frontend; Node.js, Express.js, REST APIs, and relational/NoSQL databases on the backend. Experienced shipping production-grade features in collaborative team environments with a focus on clean architecture, reusable components, and performance-optimised code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Frontend: React.js, Next.js, Tailwind CSS, Responsive UI, Reusable Component Architecture, Performance Optimisation

Backend: Node.js, Express.js, REST API Design & Integration, JWT, RBAC, Authentication, Async Programming

Databases: PostgreSQL, MySQL, MongoDB, Convex, Prisma ORM — schema design & efficient querying

Tools: Postman, Git, GitHub, VS Code, Chrome DevTools, Vercel, Netlify, Render, Microsoft Office

Soft Skills: Ownership, Cross-functional Collaboration, Attention to Detail, Clean Code Practices, Fast Learner

PROFESSIONAL EXPERIENCE

Full Stack Developer | *IP Super Shoppee Pvt Ltd*

Sep 2025 – Mar 2026

- Built end-to-end Google Ads campaign management module using React.js and Node.js — developed reusable UI components and robust backend APIs supporting campaign creation, monitoring, and optimization workflows.
- Designed and consumed REST APIs for campaign analytics; optimized async data fetching and state management, reducing analytics response time by 30%.
- Contributed to architecture decisions around shared components and scalable frontend patterns, improving codebase maintainability across teams.
- Performed API validation and functional testing using Postman across all user workflows prior to production releases; resolved frontend-backend integration issues.
- Collaborated with backend developers and stakeholders to refine requirements, review implementations, and deliver stable feature releases.

Frontend Developer Intern | *Small Fare Pvt Ltd*

Jun 2025 – Sep 2025

- Built a fully responsive enterprise admin dashboard using Next.js and TypeScript — designed reusable UI components for user management and transaction-driven workflows.
- Integrated REST APIs and optimised frontend rendering for data-heavy views, improving load performance and data refresh consistency.
- Wrote clean, maintainable TypeScript code with consistent component structure; participated in code review discussions.

Frontend Developer Intern | *Baoiam Innovations Pvt Ltd*

Nov 2024 – Feb 2025

- Implemented and enhanced React.js frontend modules by integrating backend APIs aligned with core user-facing workflows.
- Improved codebase maintainability through structured component refactoring and optimised API data handling patterns.
- Troubleshoot and debugged UI and integration issues across multiple features; ensured cross-device responsive behaviour.

PROJECTS

AI Interview Prep (PrepMate) | React.js, Node.js, Express.js, MongoDB, Gemini API

- Built a production-grade full-stack SPA — designed scalable REST APIs, implemented role/experience-based interview flows, and optimised state management for concurrent sessions.
- Integrated Gemini API for dynamic question generation; managed async workflows and database-driven session persistence with MongoDB.
- Focused on reusable component architecture, clean code structure, and end-to-end feature ownership from design to deployment.

Voice-Driven AI Fitness Coach (FitBot) | Next.js, Convex, Vapi AI, Clerk

- Developed a full-stack AI platform with real-time voice workflows using Vapi AI — integrated Convex serverless backend with a responsive, cross-device Next.js frontend.
- Designed scalable backend workflows and optimised component architecture for performance and maintainability across screen sizes.
- Configured Vapi AI voice workflows wired to Convex real-time database, enabling seamless voice-to-data interaction with sub-second UI response.

EDUCATION

Bachelor of Technology — Computer Science and Engineering

Marathwada Institute of Technology (CGPA: 7.32)

2021 – 2025

Aurangabad, Maharashtra
